

Dear MEMS/Nano/Molecular Researchers,

We have received tremendous response in terms of extended summaries submissions for NEMS 2011 thus far.

However, many researchers have requested for an extension of the submission deadline due to their busy schedule at the beginning of the new semester at many universities world-wide. Therefore, the NEMS 2011 organizers have decided to extend the extended summary submission deadline to September 15, 2010 (11:59pm Pacific Standard Time).

Please note that this is the absolute deadline of submission. Submissions after this deadline will be automatically rejected.

We thank you very much and hope to see you in Taiwan soon!

Sincerely,

IEEE-NEMS 2011 Organizing Committee
